

WELCOME TO PREMIER PRIMARY CARE'S

Monthly Newsletter

we're so glad you're here!

WELCOME 2023

Premier Update

Happy New Year! We are so very happy to start this new year with you, whether you have been a part of our family or we're just getting to know each other it is a great pleasure to have you.

As we welcome this new year, we would like to welcome you to Premier's first monthly newsletter. Here we will inform you of our current and new services as well as any promotions and educate you on different medical illnesses and care.

We would like to thank you for being a part of our family and giving us the opportunity to provide you with the best care this upcoming year.

Meet our team!

PREMIER PRIMARY CARE TEAM

Karina Mendoza, DNP | Tere Mendoza, Receptionist | Rose Morales, Lab Tech | Kim Gamez, MA | Victoria Gomez, MA | Ivan Castaneda, MA

In-office Labs

Q-MED LABORATORY

Not very many know, but we have a laboratory in-office. All of our labs are processed through Q-Med Laboratory. This ensures a faster review of results and eliminates the need for you to go to two separate facilities.

Premier Care Membership

NO INSURANCE? BECOME A PREMIER VIP MEMBER TODAY

We know that as a new year begins insurance plans change and unfortunately this year many insurances have gone out of network with many clinics. The good news is that these insurances cover specialist visits, lab work, diagnostic testing, and medication.

With this new and unprecedented situation, we would like to introduce Premier Care Membership. Premier Care Membership is a discounted VIP healthcare program designed for individuals without medical coverage. This program includes three different affordable plans exclusively for the service provided at Premier Clinic. Each plan is set at a different monthly rate and discount. The monthly rate that is paid locks the discounted price for the member and the funds go towards any procedure or plan of treatment ordered by the physician.

This program is not insurance or any form of medical coverage.

It's Cold & Flu Season

KEEP THOSE GERMS AWAY

As the temperatures drop cold and flu cases start to rise, but great news! We are here to help you get treated.

We can perform a rapid COVID-19 and Influenza test in which results are seen in 5-10 minutes to determine the course of treatment and ensure you are back in good health.

\$29

includes all services

10% discount

\$39

RPP

RESPIRATORY PATHOGENS PANEL

Respiratory Pathogen Panel is now available. This panel tests for 25 different viral and bacterial infections that cause different illnesses. This panel also helps us to detect which medication(s) your body has a resistance to.

The RPP panel is performed through a nasopharyngeal swab, exactly like a COVID-19 test. The results take approximately 3-4 days to finalize and get reviewed.

Medical Aesthetics

BODY SCULPTING, INJECTABLES, FACIALS AND MORE

Here at Premier we not only offer Primary Care services but Medical Aesthetic services as well. We offer body sculpting, injectables, facials, and much more.

Facials include microdermabrasion, micro-needling, antiaging, hydrojelly facial, hydro facial, led therapy, scrubber facial, face RF, bio facial, hot & cold, and photo & microcurrent.

Injectables include botox, fillers, PRP, Kybella, and mesotherapy.

Body Sculpting includes non-surgical BBL, radio frequency, ultrasonic cavitation, lipo laser, wood therapy, lymphatic drainage, vacuum therapy, sauna blanket, anti-cellulite, and ultrasound.

COVID-19 & Flu Vaccines Available

OMICRON, PFIZER, MODERNA, INFLUENZA

We are pleased to inform you that we are now offering the Omicron Booster here at Premier. This vaccine is a bivalent vaccine which means that half targets the original strain and the other half targets the BA.4 and BA.5 Omicron subvariant lineages.

The Omicron booster should be received after having received your first two primary doses. You should wait at least two months from your last dose to receive the Omicron booster.

If you have recently been exposed to COVID-19 and would like to receive the Omicron booster it is recommended that you wait at least three months either from the date your symptoms started or from the day you tested positive.
